

Medical Report for the Board of Directors

June 2016, submitted by Ruby Raya-Morones M.D.

Medical Staff

Provider meetings: Topics included: HEDIS presented by MedPOINT, Obesity and weight management by Dr. Alexander, and committee meetings.

Providers: We hire Keith Fukuyama as our Pharmacist in Charge and he will begin July 7th.

Productivity: Number of patient visit was 6139 visits for the month of May. This is because we are down two providers and a per diem doctor.

PCMH: We did submit for a corporate license on June 21 and now we wait until we hear that we can submit all the individual clinic s for PCMH. Our level 3 designation will expire in late August.

Satellite Clinics:

Huntington Park clinic: Still needs providers.

Cudahy: The Cudahy site passed the first audit done by HCLA with a score of 84%.

ELC: Opening day pushed back to August.

TAS: All is well.

Jefferson Wellness center: We have sent other providers there to replace Monica Cancinos who left at the beginning of this month.

QI Committee:

The committee met 6/23 and as we are aiming for improvement in the areas of diabetes we decided that we will improve the diabetes standing orders. Considerations included adding automatic take off your shoes if you are diabetic so that the provider can see your feet; adding dental, retinal, and education referrals to all DM patients. We will look into standing orders for blood pressure control and get the LVNs more involved in double checking abnormal findings on our patients. We will be working

on getting BP monitors for our patients through the dispensary/pharmacy. Hopefully at a lower price than the local pharmacies so that patients can self-monitor their BP at home.

QI special projects: PAP test with gift cards as incentives. Also coming this summer will be: PAP for moms and HPV shot for children 9-19 will be rewarded with a portrait of mom and children. HAPPI project is working on getting greater colorectal cancer screening rates and preventive services for people >50 years old. We are working in collaboration with community partners (Worksite wellness and Los Angeles Metropolitan Churches.)
